

ZUBAIR

for CABINET

AMUSU, 2026

Assalamualaikum,

My dear fellow Aligarians,

I am **Zubair**, an **M.Lib.I.Sc. student in the Department of Library & Information Science**, contesting for **Cabinet Member in the AMUSU Election 2026**. My association with AMU began in **2009 at ABK, AMU**. From my school years to my present studies, this university has shaped my education and my sense of responsibility towards its students.

I seek your vote to bring everyday student concerns into sustained, organised action. A missing photocopy facility, an inaccessible library, an unreliable internet connection or an unsafe journey across campus can disrupt a student's entire day. These concerns deserve serious representation and consistent follow-up.

This manifesto sets out ten commitments drawn from the issues students have raised. As a Cabinet Member, I will present documented demands, work with fellow representatives and the responsible university offices, and keep students informed about progress and delays. Decisions on funding, staffing and infrastructure require university approval; my responsibility is to pursue them with preparation and persistence.

I ask for your trust on a clear basis: I will listen, remain accessible and explain what I have done. When an issue is unresolved, I will tell you why and what I will do next. Your right to question your representative must continue after polling day.

Zubair

Candidate for Cabinet Member | AMUSU 2026

TEN COMMITMENTS

01 Student services and photocopy access

02 Laboratories and learning spaces

03 Wi-Fi for everyday academic work

04 Libraries and student orientation

05 Convocation and recognition of merit

06 Affordable campus transport

07 Women's dignity and common rooms

08 Fair and affordable canteens

09 Safer campus routes

10 Accountable student representation

COMMITMENTS 01-02

Services that respect your time

Clear guidance, accessible facilities and learning spaces that support the work students come here to do.

01 Student services and photocopy access

Routine paperwork should be straightforward. I will press for a more accessible and responsive Controller's Office, alongside practical document services across departments.

- **A clear route to assistance.** Seek an entrance map, visible section signs and a staffed helpdesk, with simple checklists for common student services.
- **A helpline that works.** Press for published working hours, designated staff to answer calls, and a clear route for following up unanswered enquiries.
- **Photocopying where it is needed.** Seek an affordable facility at or near the Controller's Office and supervised departmental access for bona fide students during working hours, with displayed charges.

02 Laboratories and learning spaces

Practical teaching needs usable rooms, working equipment and dependable access. I will take documented infrastructure needs to the departments and authorities responsible.

- **A department-wise needs review.** Record student-reported shortages in Geology, Education and the Faculty of Science, distinguishing room shortages, equipment faults and maintenance needs.
- **Repair and access priorities.** Seek a phased plan to restore essential equipment, provide necessary practical spaces and publish usable laboratory schedules.
- **Visible follow-up.** Ask for the responsible office and proposed timeline for each priority, and report which requests are approved, pending or awaiting funds.

THE STANDARD

Students should know where to go, what they need and how their concern is progressing.

COMMITMENTS 03-04

Access to knowledge in everyday student life

Reliable connectivity and welcoming libraries are basic academic facilities.

03 Wi-Fi for everyday academic work

Academic internet access should work on the devices students actually use. I will advocate a practical campus Wi-Fi policy that supports both smartphones and laptops.

- **Usable access on both devices.** Seek clear registration and login guidance, a workable device policy and support for authentication problems, while respecting network security.
- **Coverage where students study.** Collect reports of weak signals and repeated disconnections in departments, libraries and common study areas, and seek targeted upgrades.
- **Support with follow-up.** Press for a visible technical support channel and tracking of recurring faults so students are not repeatedly left dependent on personal mobile data.

04 Libraries and student orientation

As a Library & Information Science student, I will work to help more students discover and use AMU's learning resources with confidence.

- **Orientation soon after admission.** Seek early university and library induction covering essential offices, student services, Maulana Azad Library, membership and borrowing procedures.
- **Practical information skills.** Promote demonstrations of catalogue searching, available e-resources and databases, reference assistance and responsible academic use of information.
- **Fair seminar library access.** Press for first-year students to receive access under clear, published rules. Where space or collections need protection, seek managed access arrangements instead of blanket exclusion.

THE STANDARD

A resource becomes useful when students can find it, access it and understand how to use it.

COMMITMENTS 05-06

Recognition earned and journeys made easier

Academic achievement deserves timely recognition, and daily travel should be affordable and practical.

05 Convocation and recognition of merit

Students should not be left uncertain about ceremonies, medals or awards they have earned. I will make timely academic recognition a clear representative priority.

- **An annual convocation calendar.** Seek advance publication of a regular convocation schedule, eligibility information and application procedures so graduating students can plan.
- **A verified clearance plan.** Request a batch-wise review of pending medals and awards, including earlier batches raised by students, followed by a published distribution schedule.
- **A clear enquiry and correction route.** Seek a designated contact for award-related queries and an opportunity to correct omissions, with timely updates for affected students.

06 Affordable campus transport

I will pursue a practical shuttle or e-rickshaw proposal, with particular attention to women travelling from their halls to departments and libraries.

- **Routes shaped by students.** Consult hall residents on demand and class timings; propose links from women's halls to departments or convenient common boarding points.
- **A feasible service proposal.** Seek a pilot with published timings, designated stops, identifiable operators and affordable fares, including a subsidy proposal for university consideration.
- **Connections across faculties.** Include inter-faculty travel and access needs of students with disabilities in route planning; use student feedback to improve any approved pilot.

THE STANDARD

Clear schedules and practical arrangements should replace avoidable uncertainty.

COMMITMENTS 07-08

Dignity, comfort and affordable essentials

Everyday welfare should be reflected in the way campus services are staffed, maintained and priced.

07 Women's dignity and common rooms

Security arrangements must protect students' dignity. I will raise concerns about library exit checks and press for adequate, well-maintained facilities for women.

- **Appropriate female security staff.** Seek trained female staff at library checking points to assist women. Any necessary personal search should be conducted by authorised female personnel with privacy and dignity.
- **Clear procedures and complaints.** Seek a published checking procedure and an accessible route to report inappropriate conduct, with confidential handling of concerns.
- **Usable Girls' Common Rooms.** Press for provision where needed and upgrades where facilities are inadequate, including seating, ventilation, drinking water access, cleanliness and sanitary disposal arrangements.

08 Fair and affordable canteens

Food on campus should be reasonably priced, hygienic and predictable in cost. I will advocate transparent pricing and meaningful student feedback.

- **A common affordable essentials list.** Seek university-approved rates and standard portions for basic items across canteens, with clearly displayed prices for other menu items.
- **A visible route for complaints.** Press for a named contact for overcharging, poor quality and hygiene concerns, supported by receipts or other details where available.
- **Regular review with students.** Seek periodic checks of prices, portions, drinking water and cleanliness, and require any proposed price revision to be explained and approved through the proper process.

THE STANDARD

Student dignity and reasonable living costs belong at the centre of campus welfare.

COMMITMENTS 09-10

A safer campus and an answerable Union

Representation should make daily concerns visible and keep progress open to scrutiny.

09 Safer campus routes

I will pursue a coordinated response to poorly lit stretches and student concerns about stray dogs, with priority for routes used after evening classes and library hours.

- **Identify and repair dark stretches.** Map student-reported lighting gaps around halls, faculties, libraries and connecting paths; seek repairs, additional lighting where needed and routine maintenance.
- **Humane management of stray dogs.** Request coordinated action by the university and qualified municipal or veterinary teams, including vaccination, sterilisation, waste management and response to reported bite risks.
- **A dependable reporting route.** Seek visible contacts for urgent safety concerns and follow up recurring locations. Safety planning should support students' mobility and access.

10 Accountable student representation

I will make my own representative work open to review and press for a Union that listens beyond election week.

- **A public Promise Tracker.** Record each manifesto commitment, representations submitted, responses received and the next step. Publish a monthly update, including delays and unresolved requests.
- **Grievances followed through.** Maintain a record of concerns students bring to me, acknowledge them and share follow-up updates. Publish issue summaries without exposing personal or sensitive information.
- **Open houses and a Student Parliament.** Hold a monthly open meeting for my work and propose an AMU Student Parliament as a consultative forum, with participation across halls and departments and published action points.

THE STANDARD

Students should be able to see the work, question the delay and judge the result.

FROM COMMITMENT TO ACTION

How I will begin

My first 90 days in office will establish a visible process for listening, submitting demands and reporting back.

DAYS 01-30

Listen and document

Meet students across departments and halls, record priority concerns and open my grievance channel. Publish the first Promise Tracker and document urgent service and facility requests.

DAYS 31-60

Submit and follow up

Submit documented demands and request meetings with the responsible offices. Hold the first open house, publish responses received and follow up urgent and unresolved concerns.

DAYS 61-90

Report and review

Publish a progress report showing submissions, approvals, work underway and completed outcomes. Explain delays, identify the next action and revise priorities with student feedback.

My pledge to you

I will give your concerns a fair hearing, pursue them through the proper channels and remain accountable for my effort and follow-up. I cannot promise that every demand will be approved. I can promise that I will not treat your vote as the end of my responsibility.

I respectfully ask you to cast your valuable vote for **ZUBAIR for CABINET**. Give me the opportunity to serve AMU's students with sincerity, preparation and consistent work.

A REMINDER TO VOTERS

For the Cabinet election, follow the Chief Election Officer's official instructions on the number of selections required and the correct way to mark your ballot. If anything is unclear, ask polling staff before marking it.
